

National and International
Credit Reports

Since 1962

Family-owned company with
international scope

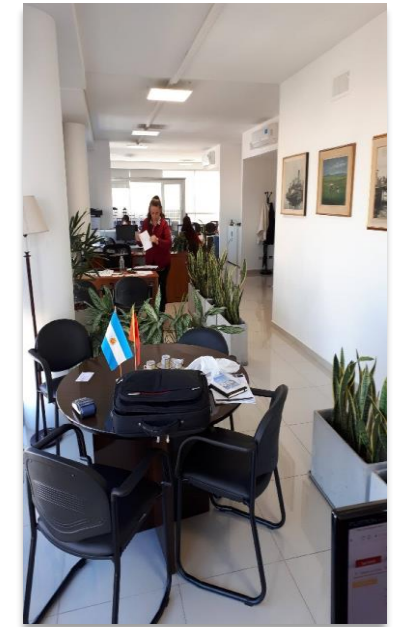

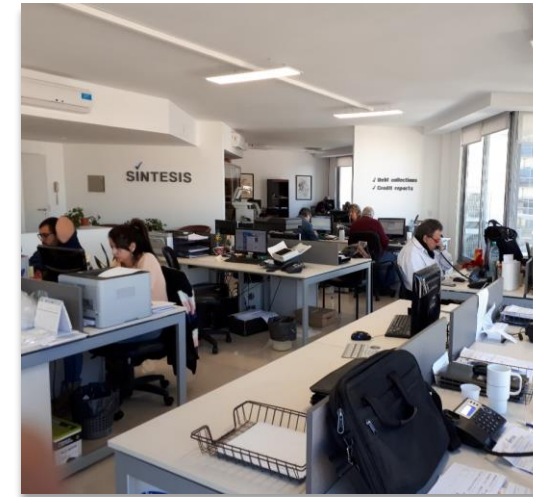

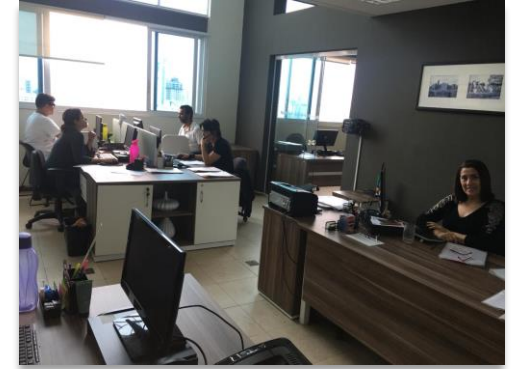

We operate in Latin-America

From Mexico to Argentina

Commercial Offices in Argentina and Brazil

- Commercial Offices in Argentina (Headquarters)
- Commercial Offices in Sao Paulo – Brazil
- 85 employees in both offices
- 196 correspondents in Latin-America for visits and investigations on companies

Orientation of the Credit Report

- Credit analysis of clients or future clients
- Coverage analysis for credit insurance
- Analysis of future suppliers oriented to the fulfillment of liabilities
- Analysis of capacity to carry out works or services, temporary imports, etc.

We do not search for commercial contacts

SINTESIS

- Credit analysis of future clients: we analyze creditworthiness and the legal requirements to do business with a company.
- Credit analysis of future suppliers: we analyze the company's commercial behavior and the compliance of its obligations regarding production, quality and delivery of goods.
- Coverage analysis for credit insurance: it is similar to the previous point since the credit insurance coverage is similar to the risk of granting a commercial credit.
- Capacity reports to fulfill works, temporary imports: it is similar to the previous point, but it is related to a surety.

We are specialists in Credit Reports for:

- Export & credit insurance companies.
- Banks.
- National and Multinational companies.
- Analysis outsourcing for companies that do not have their own structure.

- The first three aforementioned: Export credit insurance corporations, Banks and Big companies usually have a structure for analysis, so they request credit reports in order to receive new commercial or financial information and be able to carry out their analysis.
- The other ones are small and medium companies whose credit decisions rely on the analytical credit reports that we provide. The service is also aimed at Surety companies, which are not used to carrying out this analysis, so they can offer credit insurance services.

Credit report content for credit analysis; the most often used to evaluate the coverage of credit insurance:

- FINANCIAL DATA
- INSURANCE
- DETAIL OF BUSINESS ACTIVITIES
- BANKS/ CREDIT LIMITS AND BANK DRAFT LIMIT
- CONCEPT AND COMPLIANCE
- SUPPLIERS AND CLIENTS
- FINAL CONCLUSION
- FINANCIAL ANALYSIS BASED ON 21 INDICATORS
